## What have Year 4 been up to?

Year 4 have started the New Year with an electrical charge. This week we launched our science unit learning all about electricity. We walked around our classroom and identified different objects that run on electricity. We discussed how the electricity travels to the object and which materials allow this to happen.

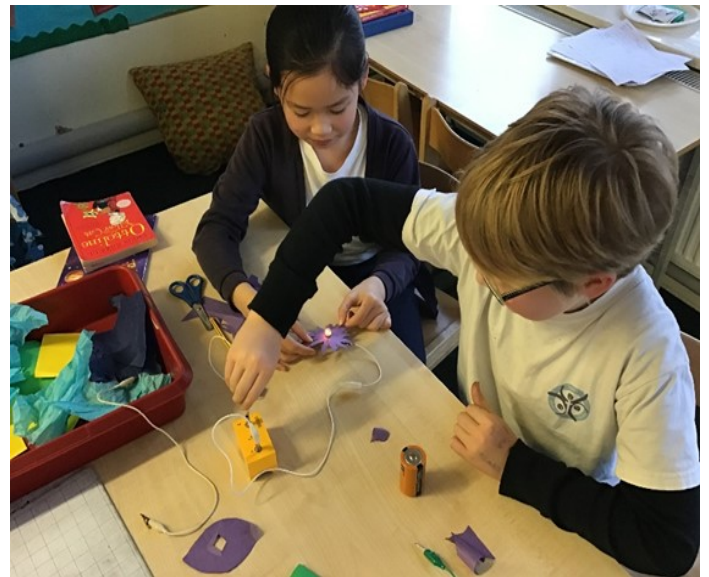

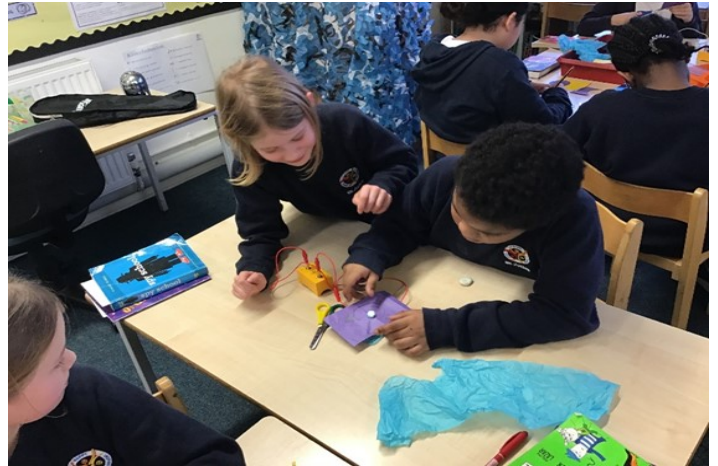

## What has Year 4 been up to?

In PE we have been learning new skills used in netball. We refined our chest and bounce pass from last week and then learnt the skill of doing a shoulder pass. We then worked in threes to move across the court passing the ball to our partner with the third person acting as the defender.

## What has Year 4 been up to?

In DT we have been using our science knowledge about electricity and circuits. We will be using this knowledge to design and plan a final product that incorporates an electrical circuit. In this lesson we experimented with how we might incorporate an electric circuit using a range of materials.
