Alexander
Graham Bell

From Morse to Mobiles

Key Vocabulary

Morse code - a code used for sending messages. It represents each letter of the alphabet using short and long sounds or flashes of light, which can be written down as dots and dashes.

Semaphore - a system of sending messages by using two flags. You hold a flag in each hand and move your arms to various positions representing different letters of the alphabet.

Graph - an instrument that writes or draws. From the Greek meaning to write.

Mobile - describes something large that can be moved easily from place to place.

Links to our previous learning:

In Year 1, we learned about how transport has changed over time. We also learned about toys from the past.

In Year 3, we explored inventions created and used by the Romans.

In Year 6, we learned about the Victorians and the history of their achievements.
